RELEVANT PROJECTS

AIRBNB CLONE

A replica of AirBnB built with Python and MySQL | 10 Oct, 2022 - 23 Dic, 2022

- Created a command interpreter to manipulate data without a visual interface and implemented two options for back-end storage engines: ORM with SQL and a file storage system with JSON. Additionally, completed a website that shows both static and dynamic content while integrating an API that provides a communication interface between the front and back end.

SIMPLE SHELL

A shell built in C programming language | 16 May, 2022 - 21 May, 2022

- Designed and developed a command interpreter through the usage of signal handling to execute multiple commands. Implemented two modes of usage: interactive and non-interactive.

EDUCATION

2023 | Holberton School

Foundations of Computer Science and Full Stack Web Developer

2021 | Polithecnic University of Puerto Rico

Bachelor's in Computer Science (Incomplete)

NON TECHNICAL EXPERIENCE

Highgate Hotels, Ressidents Inn by Marriott

Bartender | May, 2022 - Present

- Maintained customer satisfaction with forward-thinking strategies focused on addressing customer needs and resolving concerns.
-
